

Job description: Senior consultant

If you are experienced in quantitative modelling and a critical thinker this opening at The Green House presents a great opportunity to apply your mind to interesting and important problems. Our consulting focuses on analysing the technical, environmental, policy-related and socio-economic implications of climate change mitigation in South Africa. We also do work that quantifies the broader sustainability impacts across a wide range of sectors from agriculture to retail. Our work is highly regarded by our clients who span government, the private sector and NGOs. As a small consultancy, we often partner with like-minded, talented colleagues at other niche consultancies, which provides exposure and experience in complementary fields of research and analysis. The Green House is based in Cape Town.

We are looking for a senior consultant to join our team in 2016 who meets the following requirements:

- A Masters Degree in engineering or science, as well as a minimum of three years consulting experience.
- Demonstrated experience in project management, including working within budgets and timelines, and supervising project teams.
- Strong research skills, analytical ability and attention to detail.
- Demonstrated experience in quantitative modelling.
- Excellent verbal and written communication skills.
- Ability to work simultaneously on multiple projects.
- Willingness to travel (mostly locally).

Salary is negotiable based on experience. For senior candidates, a bonus structure over and above a base salary will be discussed.

Please submit your CV, a covering letter that includes an indication of how your skills and experience meet the above requirements, and contactable references to jobs@tgh.co.za before 30 November 2015.

This position is only available to South African citizens and permanent residents.

Candidates who do not meet the above requirements will not be considered. If you have not heard from us within 2 weeks of the closing date, your application has not been successful.
